

IncuSec 4th Edition

REPORT

Date: 17th March 2018

Venue: Bill Gates Lab, HITS

The session covered the topics of previous meet, of using Burp Suite.

The 4th edition was a follow up of 3rd edition, discussing the effective use of Burp Suite. Burp Suite is a proxy tool with scanning, crawling, repeater and many other features. Burp being the most precious tool in Web app vulnerability scanning, a clear explanation and how to use Burp effectively was discussed in the meetup.

A small discussion on Capture The Flag was done, based on the BreakSec CTF to be held on March 27th 2018.

The session covered the effective use of Burp Suite and ended with Q&A session.
